Dräger Alcotest® 5510 Handheld Breath Alcohol Screener

Dräger. Technology for Life®

Dräger Alcotest® 5510

Sample. Read. Proceed.

YOUR CHALLENGE

Accidents caused by drunk driving can be devastating. As an officer, the challenges you face in maintaining road safety increase when impaired drivers create a danger to public safety. It is essential that you have a breath alcohol screening device that is reliable and ready to use within seconds.

A Trusted Solution

The Dräger Alcotest 5510 handheld screener provides the quality and accuracy that law enforcement agencies have come to expect from our breath alcohol detection products. With a wide range of configurations, the instrument easily adapts to meet your requirements and local regulations for preliminary breath testing. With this device you simply take a breath sample, read the results and proceed with your best course of action.

KEY FEATURES

Automatic, Passive and Manual sampling modes

Integrated data memory

“Slide ‘n’ Click” mouthpiece

Compact size

Low power consumption

Ready for use in six seconds

The Dräger Alcotest® 5510 is easy to use under any conditions.

SAVING LIVES ONE BREATH AT A TIME®

The Dräger fuel cell sensor uses optimized gas dynamics to measure alcohol concentration, ensuring that the instrument is ready for an initial or repeat test within seconds. Even at high alcohol concentrations, the measurement result is displayed quickly and accurately. With Dräger, you are saving lives one breath at a time.

Compact and easy to use

A compact size makes this handheld screener easy to grip. An intuitive interface helps you to quickly take a breath alcohol sample, read the results and proceed.
